This is to certify the finished parts listed on the C.o.C. have originated from qualified sources and have been inspected and accepted as conforming to current specifications, standards or approved concessions. Evidence of inspection and certification from the manufacturer is on file. These records are available for examination on request. The Batch-No. is a HYDRO-internal number for the traceability of production and is not necessarily marked on the part itself. The goods listed in this accompanying document do not contain iron and steel of Russian origin as defined in EU Regulation No 833/2014.
